PROFILE

Front-End Developer specialized in React.js and Next.js, with a strong foundation in building responsive, API-integrated web applications. Actively growing my back-end skills (Laravel, MySQL) to strengthen my full-stack understanding and deliver more complete solutions in real-world projects.

TECHNICAL SKILLS

Languages

- HTML, CSS, JavaScript (ES6+)
- TypeScript, PHP, SQL

Styling & Animation

- Bootstrap, TailwindCSS, Sass
- TW Elements, GSAP, Framer Motion

Back End & Integration

- RESTful APIs (Design & Integration)
- Authentication & Authorization (Sanctum)
- Database Design (MySQL)
- CRUD operations
- API Security & Validation

Frameworks & Libraries

- React.js, Next.js
- Laravel

UI & Component Library

- Material UI, Shadcn, React Bits
- Basics of Figma UI

Tools & Platforms

- Git
- GitHub
- Postman
- Vercel
- Netlify
- PHPMyAdmin

PROJECTS

Cartony Platform

Front-End

- E-commerce website built with React, JavaScript, PHP, Laravel, and REST APIs integration.
- Includes admin dashboard to manage products, users, and orders, responsive design for all devices, and smooth, fast, and simple user experience with easy navigation.

WeshAlafas

Graduation Project

- A web platform, mobile application, and dashboard that connect farmers, hotels, businesses, and merchants in one system. I was responsible for the Front-End development and helped design the UI/UX to create a simple, responsive, and user-friendly experience.

Fikriti platform

Front-End

- Service platform built with React for the frontend, and PHP with Laravel for the backend.
- Includes responsive design, interactive UI, and an admin dashboard to manage users and content.

Tasks App

Back-End

- Backend APIs for a task management application that enables users to organize and manage their daily tasks. Developed using Laravel, implementing RESTful APIs for authentication, task CRUD operations, user management, and data persistence with clean architecture and proper validation.

E-commerce Application

Back-End

- Built a RESTful backend using Laravel for an e-commerce application. Developed APIs for authentication, products, categories, cart, checkout, and order management, with database design and request validation.

PROFESSIONAL EXPERIENCE

Software Engineer

Yanabea App

06/2026 – 07/2026

Remote

- Completed a two-month internship at Yanabea App, where I quickly learned a new tech stack (Flutter connected to Laravel APIs) and delivered a working feature on time. Worked closely with senior developers through code reviews, improving my skills in clean code, API integration, and state management.

Front-End Developer

Fikriti Team

05/2025 – 03/2026

Remote

- Worked with a team using React and Next.js on 3+ real projects for freelance clients. Built responsive, user-friendly web apps and collaborated closely with the team to solve real problems.

EDUCATION

Bachelor of Management Information Systems (MIS)

Science Valley Academy (SVA) - Al Obour

2022 – 2026

GPA: 3.70 / 4.0 – Excellent with Honors

SOFT SKILLS

Team Work

Attention to Details

Time Management

Communication Skills

Self-Learning

Quick learner

Logical Thinking
